

Buzz Math Game

Grade Range: Elementary

Context: Math

Skills Addressed: Using a switch to activate a spinner; Using voice output; Following directions

Equipment: Spinner, such as an All-Turn-It; Single switch; Voice output device, such as a Step-by-Step Communicator

=====

Description

1. The student activates a single switch to select a number on the spinner (e.g., 5)
2. Other students in class all stand in a circle, and one by one, say a number – 1,2,3,4, etc.
3. The student using voice output says his/her number when it comes to his place in the circle.
3. The student whose turn it is to say “5”, says “buzz” instead, and sits down. The student with the voice output device also activates the voice output device with a buzzer sound on it.
4. The students keep counting off numbers, and say “buzz” and sit down whenever a multiple of 5 is reached.
5. The game continues until there is just one student standing.
