

Factors Which Increase The Occurrence Of Undesired Behaviour

What antecedents (environment, activities, people) lead to an increase in the occurrence of the undesired behavior. We want to try to eliminate these components from your student's schedule.

- _____
- _____
- _____
- _____
- _____
- _____
- _____
- _____
- _____

The following are examples for a sample student:

- having a wet diaper
- listening in a group discussion with nothing for his hands to engage with
- becoming over stimulated (too much noise & movement, less structured activities)
- transitioning with peers in hallway
- being passively involved
- participating in a hand over hand activity
- having his arms or legs restrained (splints, AFO's)
